# Moon Shoes®

Congratulations on your new Moon Shoes®. PLEASE CAREFULLY READ THE FOLLOWING INSTRUCTIONS! Your Moon Shoes® consist of: two bases, two shoe platforms and one bag of 40 bands (36-maximum needed + 4 Extra Bands)

**CAUTION:** Adult assembly required.

The rubber bands are first fed through the slots in the shoe platform, then over the top of the base and hooked onto the posts below. Stretched rubber bands can be dangerous so when fitting, hook a thumb into each end of the band to pull and press down over the holding post. Hold away from your eyes. Insert toe and heel bands first, shown in the diagram below (see steps 1 and 2). This attaches the shoe platform to the base. Carefully follow the remaining steps and the diagram. Insert the bands into the shoe slots in the same order as shown below:

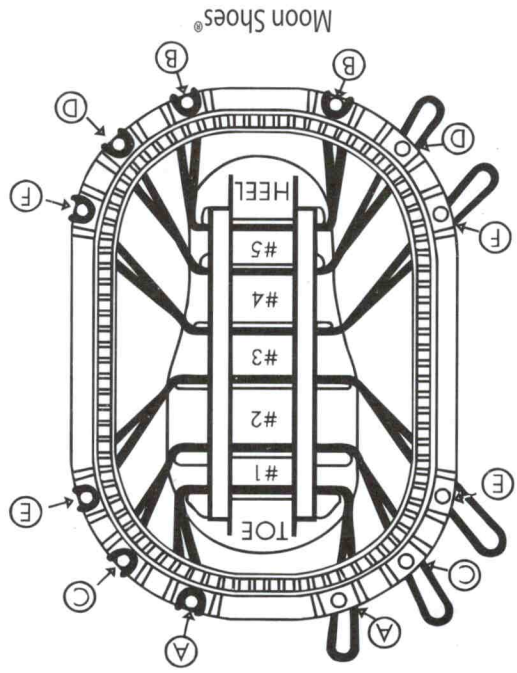

- Step 1 ..... Slot #1 ..... hook one band to each post marked A on diagram.
- Step 2 ..... Slot #5 ..... hook one band to each post marked B on diagram.
- Step 3 ..... Slot #2 ..... hook one band to each post marked C on diagram.
- Step 4 ..... Slot #4 ..... hook one band to each post marked D on diagram.
- Step 5 ..... Slot #3 ..... insert two bands. Hook one to each post marked E, and one to each post marked F on the diagram.

## CAUTION: Improper use of rubber bands may cause injury.

27.2 kg(60lbs) or less	1 band per slot
27.2 kg(60lbs) - 45.4 kg(100lbs)	2 bands per slot
45.4 kg(100lbs) - 58.9 kg(130lbs)	3 bands per slot

## Testing Your Moon Shoes®

After test jumping, you may want to increase or decrease the number of bands in order to achieve maximum performance. Ideally, you want the bands to stretch as far as possible without the shoe platform hitting the ground.
